

Andrew Alliance

LET ANDREW HELP !

- > He never misses a well
- > He pipettes and mixes consistently
- > He cherry picks and/or re-arrays from plates to tubes, tubes to tubes, or tubes to plates
- > He automates serial dilutions with 2 minute set-up
- > He works in hoods, glove boxes, and cold rooms

COMMON APPLICATIONS

GENOMICS

- QPCR Set-up
- KAPA Quant Set-up
- Normalize libraries with 3 minutes to set-up
- Pool libraries (PCR plate to tube or tubes with 2-3 minute set-up)
- Load a microfluidic chip
- Reconstitute lyophilized primers

CELL BIOLOGY

- Build fresh flow cytometry cocktails
- Add probes / antibodies to slides

PROTEIN / ANTIBODY ANALYSIS

- Bradford assay set-up
- Normalize samples for SDS PAGE, CE or Immunoassays
- Glycan analysis
- Biacore Reagent Prep

REAGENT ALIUQUOTING & MASTER PLATE BUILDING
